

Tubular PVC Matting No. 116

Wet Area Anti-Fatigue Mat -10mm thick

Features and Benefits

- Manufactured from non-toxic food grade PVC tubes.
- Provides relief from standing on cold hard floors.
- Impervious to most liquids, including some types of acid, oil and alcohol.
- Energy absorbent properties help prevent equipment damage and breakages.
- Contours to the shape of the floor.
- Self draining design allows liquid to flow through and drain away.
- Can be installed in just a few minutes without the use of special fixing tools even on uneven surfaces.
- Tubular PVC Matting is mildew, chemical and flame resistant.
- Makes many workplace situations safer and more comfortable, and can increase productivity by reducing the effects of fatigue.
- Ideal for use in packaging areas, most commercial applications and light duty industrial applications where anti-fatigue properties are important.
- Constructed in grid formation, Tubular PVC Matting is lightweight, easy to roll up and clean and can simply be cut to any size or shape required.

Mat Specifications

Uses: For use in wet environments. Also suitable for dry areas.

Compound: PVC Tubes

Temperature Effect: Flexible from -12c to 60c

Flammability: This material does not support combustion, being self extinguishing on removal of flame. Gases evolved on flame application are predominantly HCl and CO

Warranty: 1 year, conditional

Colours: Black or Blue

Mat Stock Sizes*

600mm x 12M roll

900mm x 12M roll

1200mm x 12M roll

Per metre cut to length

x 600mm, 900mm or 1200mm wide (* Sizes are approximate only.)
